

# Find Call

## Logbook Call Sign Activity

Here you can query *Logbook* to find out the last time log data was uploaded for a particular call sign.

Last upload for **VP8ORK**: 2012-12-31 12:33:22Z

(Note: The date shown is when the log was sent to *Logbook*, not necessarily the date the QSO took place.)

## Instructions

Enter the call sign of the station you worked to see if log data has been uploaded since you worked the station. If it has likely.

Note that as elsewhere in *Logbook*, call signs with portable identifiers are distinct. That is, KE3Z, KE3Z/7 and F/KE3Z *do not* find KE3Z/7 or F/KE3Z log information.

## Why can't I just see if I'm in the other station's log?

As a security measure, you cannot see the other station's log entry unless you provide a matching log record. This pre

**Find Call** lets you search a call sign to find out the last time log data was uploaded for a particular call sign.

While the date and time of the upload may be after your QSO this does not necessarily mean that the other operator has upload a QSO with you but it will tell you that the operator is active in LoTW. If you think you should have a matched QSO with the station in question please contact the operator. LoTW staff does not research claimed QSOs and will not reveal what is another users logs.

To prevent "trolling" for busted calls LoTW users cannot view other user's logs.
